

	FIRE EVACUATION PLAN	Specification
		KK_189

1. Announcement and management of evacuation:

The plant director, or in his absence an authorised representative, is responsible for the announcement and management of the evacuation.

In the absence of the management (night shift, holidays and weekends), the announcement and management of the evacuation will be managed by the shift manager. The evacuation will be announced by sounding the EPS signal or calling "Fire" or by any other available means to ensure that all persons in the endangered building have been warned of the danger.

2. Evacuation is being handled by:

fire watch commander (shift leader) + fire watch members

3. Method and routes of evacuation:

Evacuation will take place gradually according to the marked escape routes to the designated area in front of the gatehouse. Order of evacuation of employees, persons and material :

- persons and employees with reduced mobility,
- persons and employees capable of independent movement,
- Material

4. Determination of the place of concentration of employees, persons and materials:

All persons and employees will assemble in the open area in front of the gatehouse building on the plant premises, and will be escorted to another area if necessary under the direction of management.

Each immediate supervisor of his/her department is responsible for controlling the number of evacuated employees. Evacuated material will be concentrated in the parking lot opposite the gatehouse.

A member of the fire patrol will be in charge of securing the material, supervision will be provided by plant security.

5. First aid security:

Any first aid to evacuees shall be provided by [responsible persons designated by the company management](#).
